

ASSEMBLY GUIDE

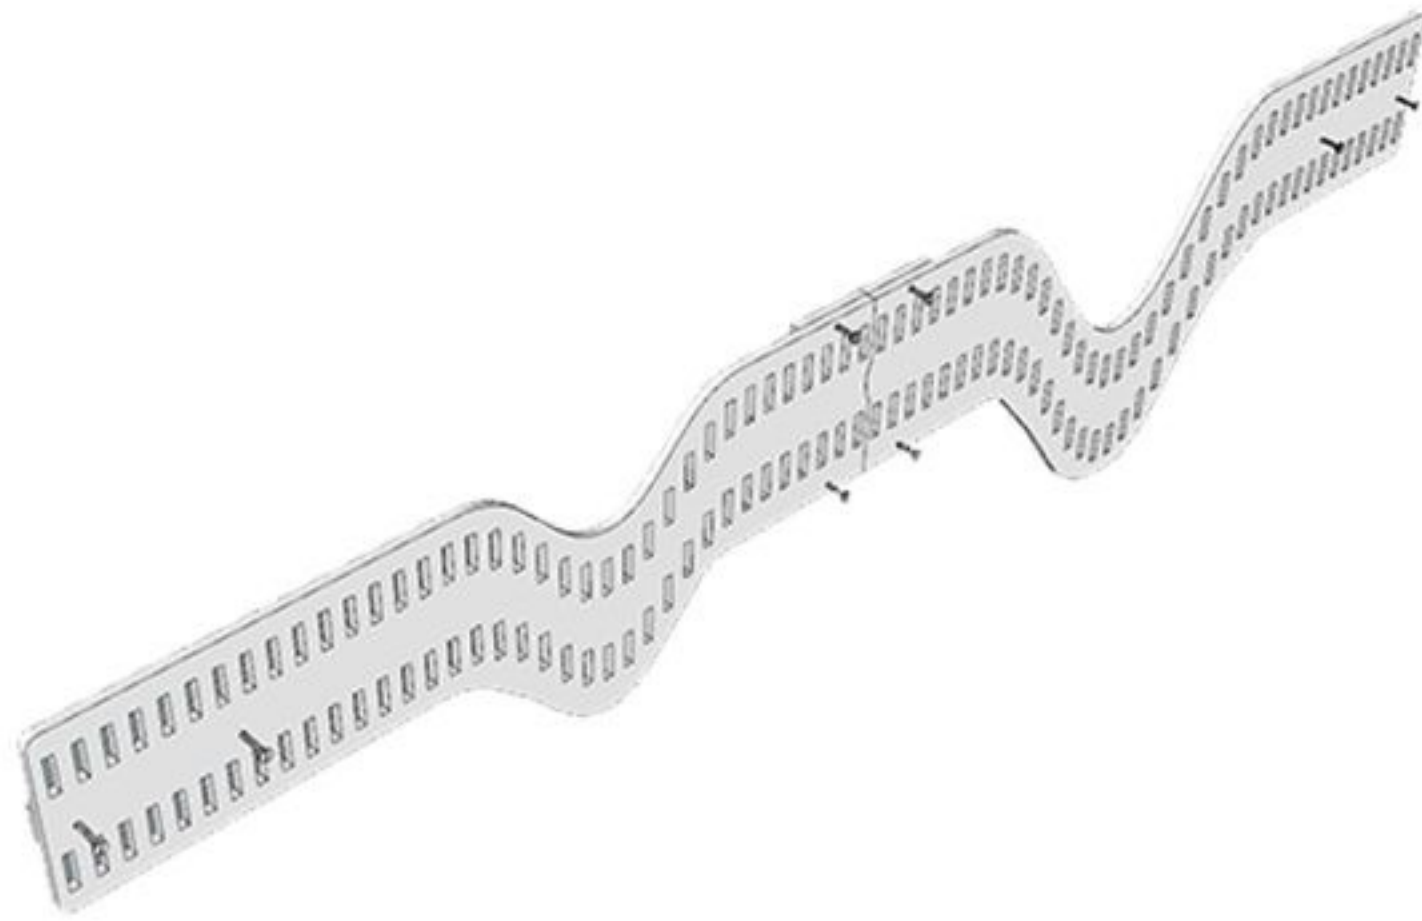

Hold the shelf level on the wall where you will mount it, and mark reference points through the holes. Drill the marked reference points on the wall and insert the dowels. The base of the shelf should be positioned as shown above.

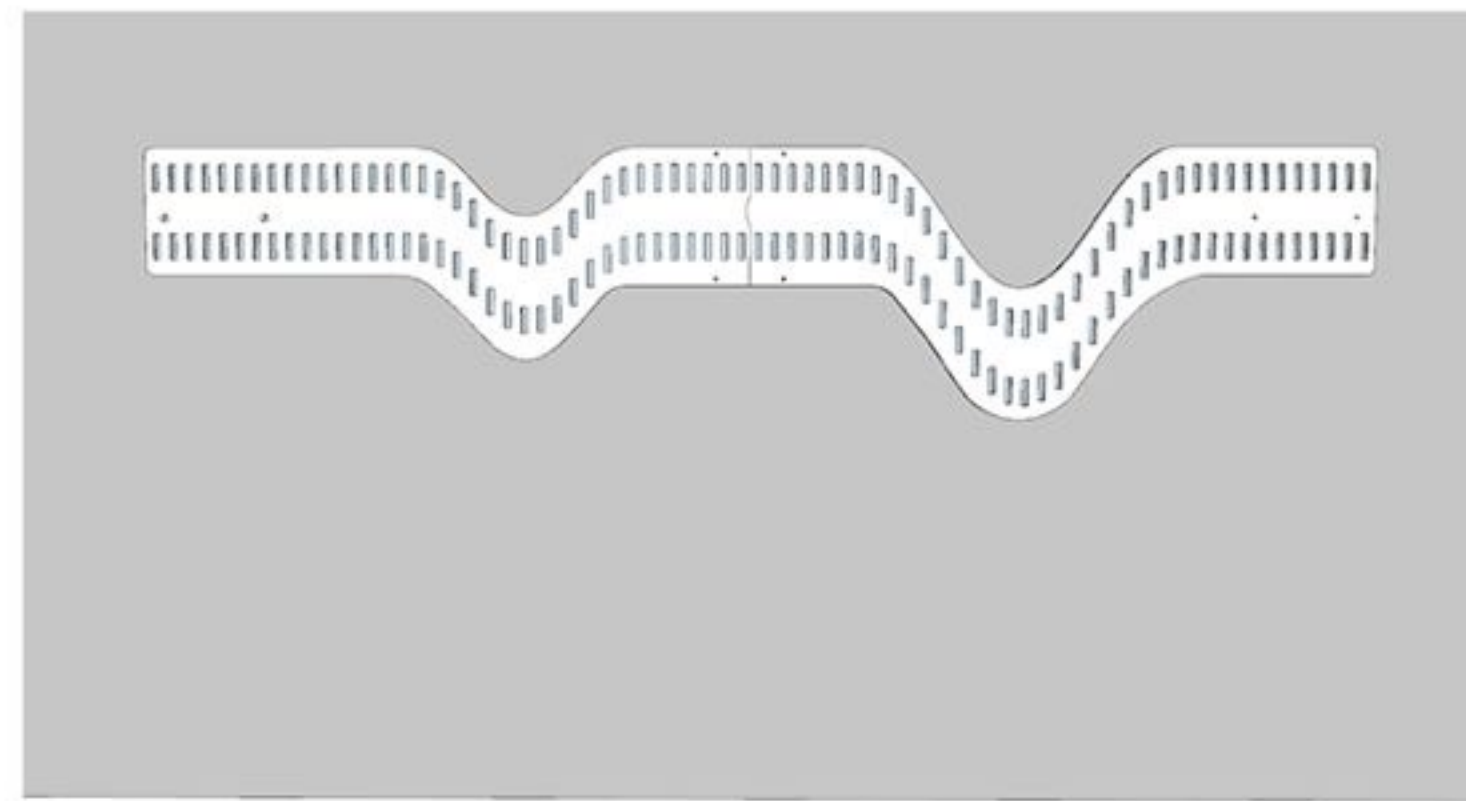

"Reference holes"

Then, as shown in the diagram, mount the pieces that will create a gap between the base and the wall onto the base using screws.

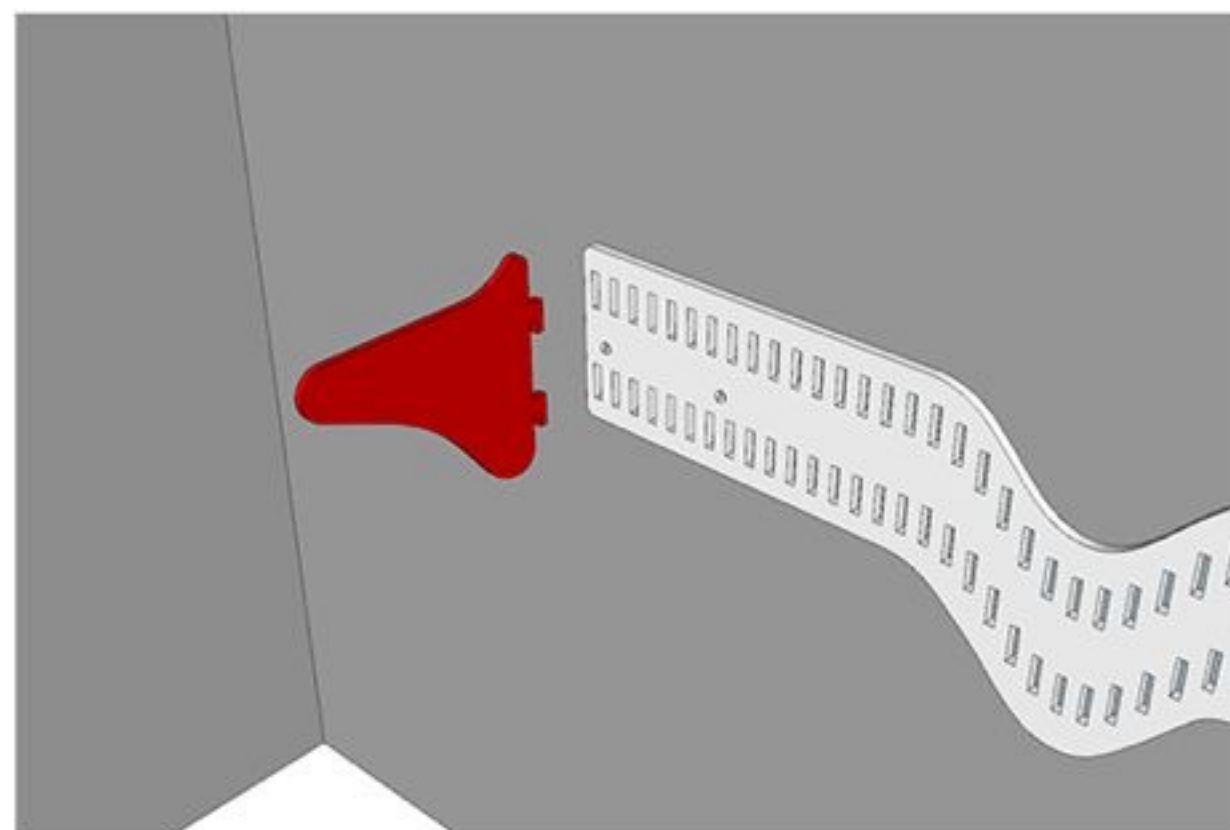

Turn the screws only enough to connect the base with the attachments.

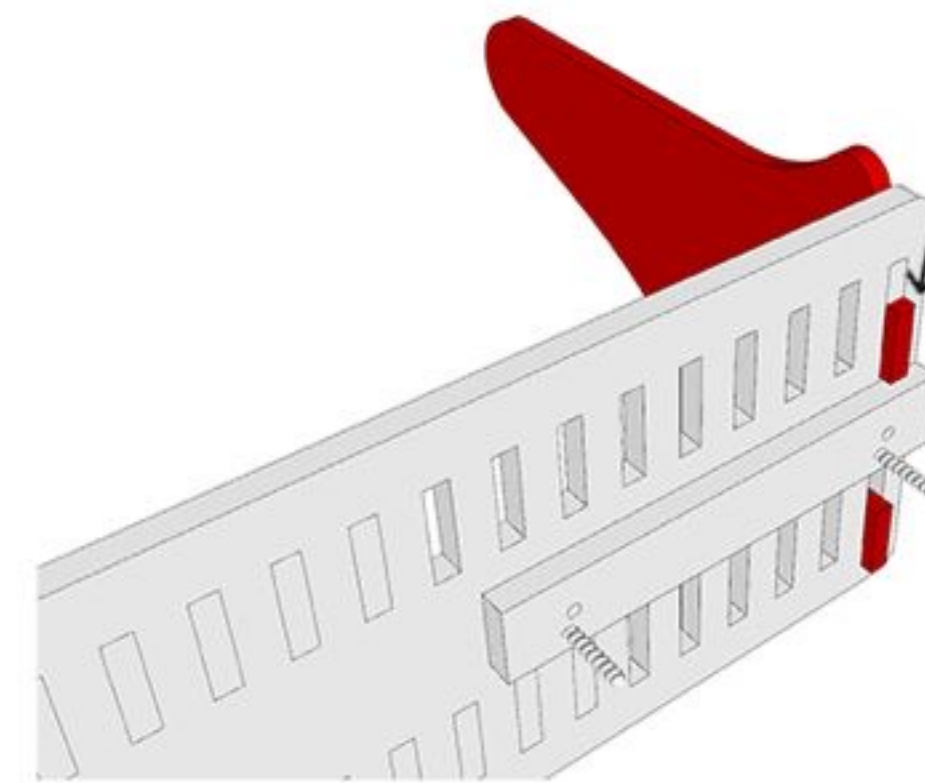

Mount the shelf base onto the wall dowels that were previously installed.

Well Done! It's almost done.
Just take a breath and continue:)

Then, Start assembly the identical pieces one by one

The pieces are designed to be hooked in place. After inserting them into the holes, press downwards to secure them.

Thanks for choosing us. Hope you liked your lovely shelf. We are thrilled to hear your experience and reviews:)
