

Assembly Guidance

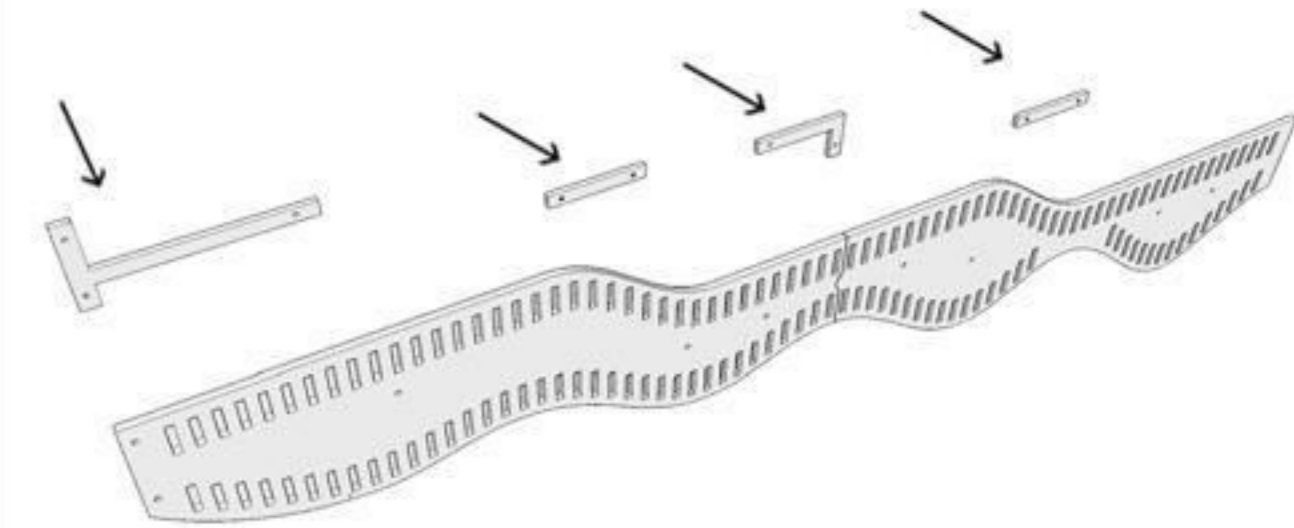

Firstly, hold the shelf level on the wall where you will mount it, and mark reference points through the holes. Drill the marked reference points on the wall and insert the dowels

The base that written on "L" should be on left and the one that written "R" should be on the right

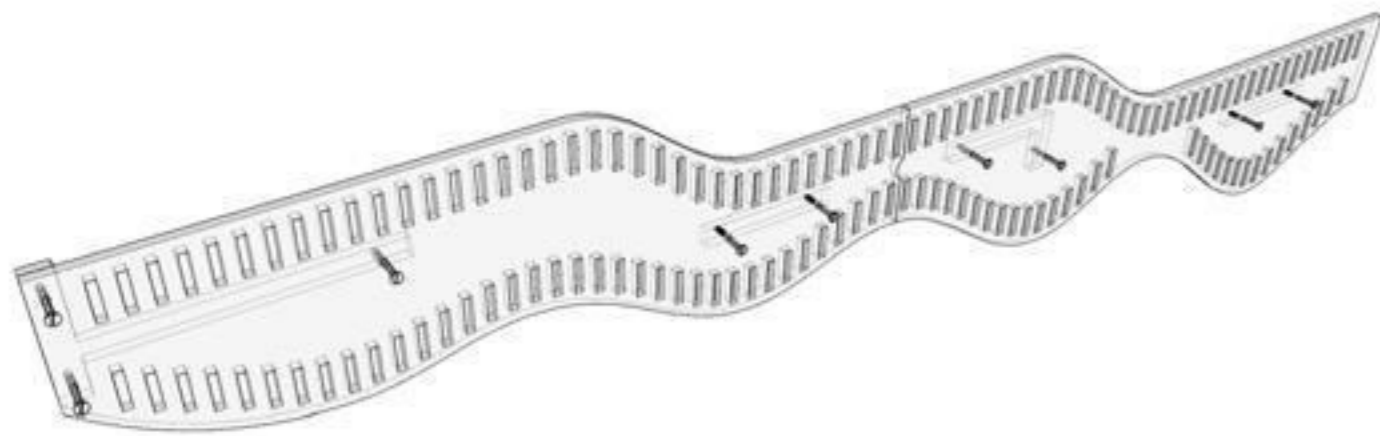

Reference Points

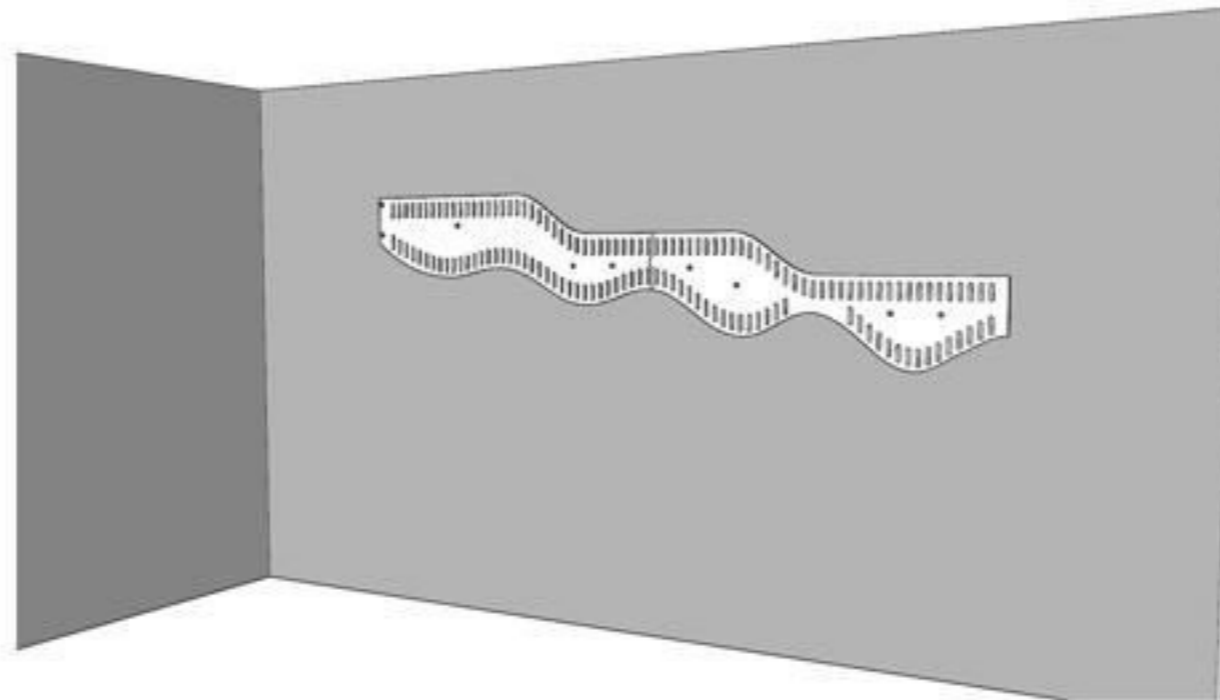

As shown in the diagram, mount the pieces that will create a gap between the base and the wall onto the base using screws.

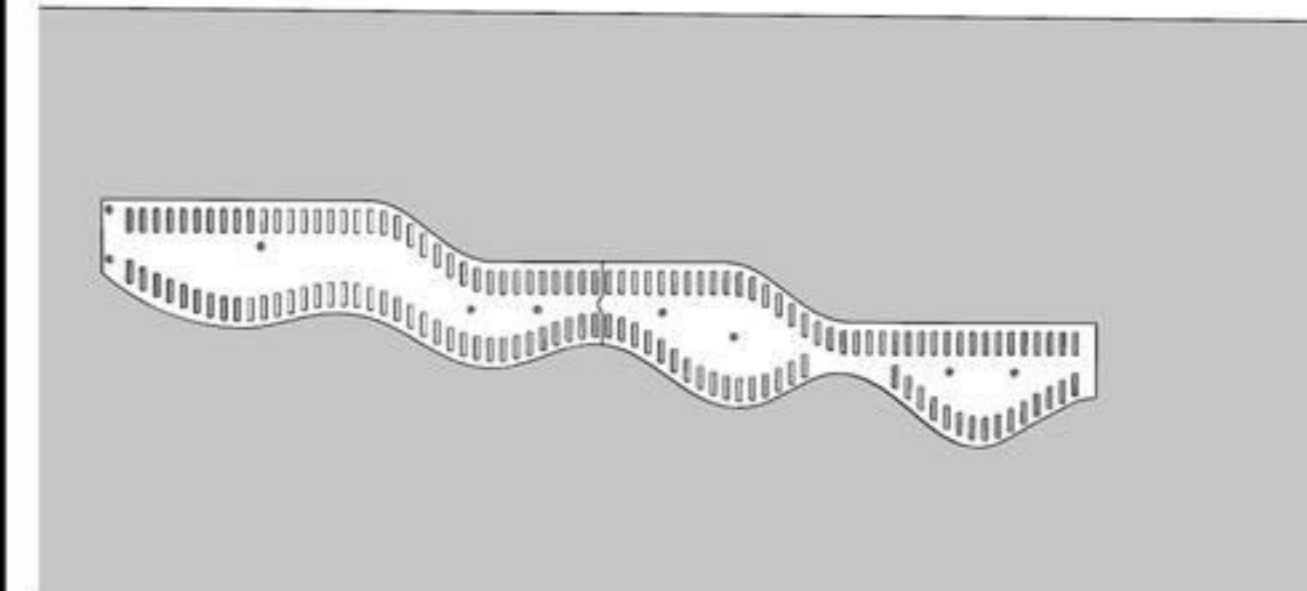

Turn the screws only enough to connect the base with the attachments. The positions of holes might be different according to length of your product.

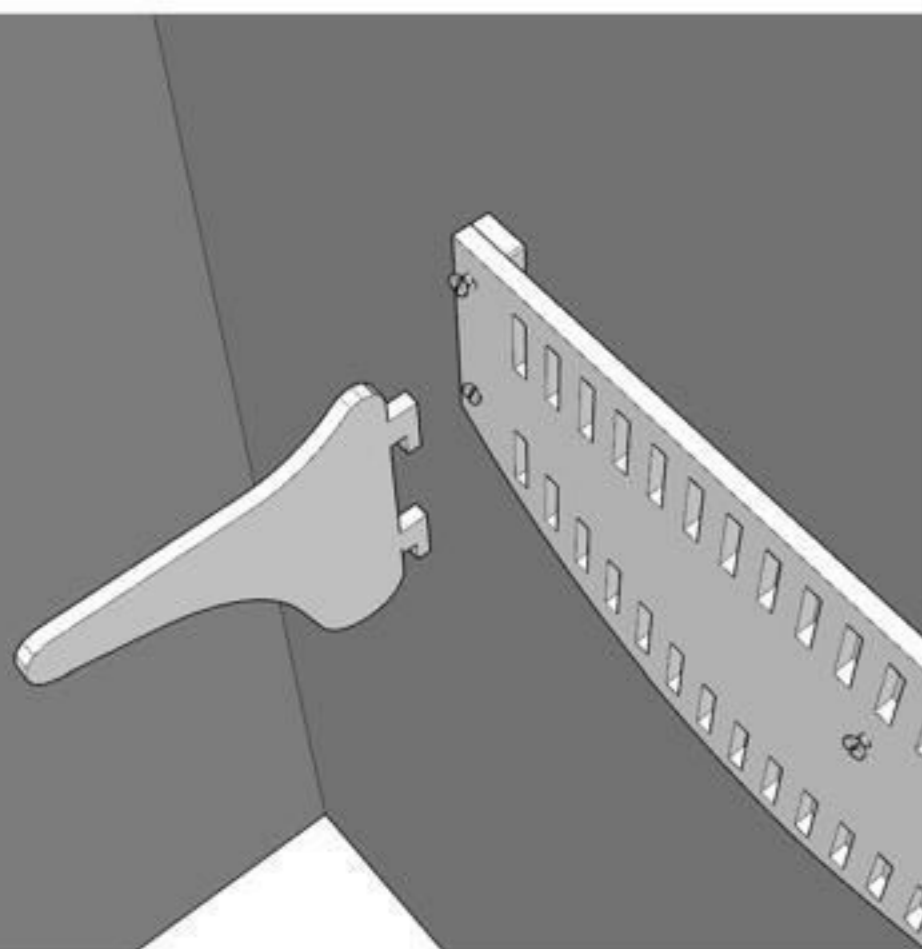

Turn the screws only enough to connect the base with the attachments.

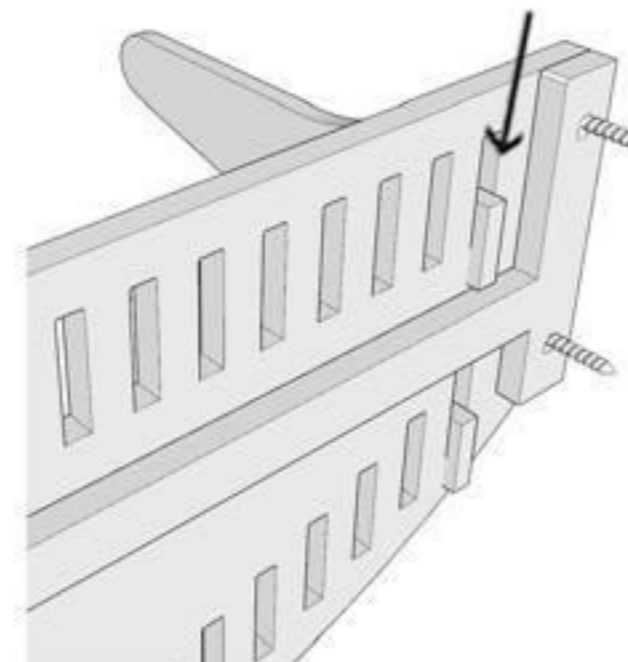

Mount the shelf base onto the wall dowels that were previously installed.

The base of the shelf should be positioned like as shown on above

Then starting from the left, attach the numbered pieces in order beginning with the one labeled "0".

The pieces are designed to be hooked in place. After inserting them into the holes, press downwards to secure them.
