

# ASSEMBLY GUIDE

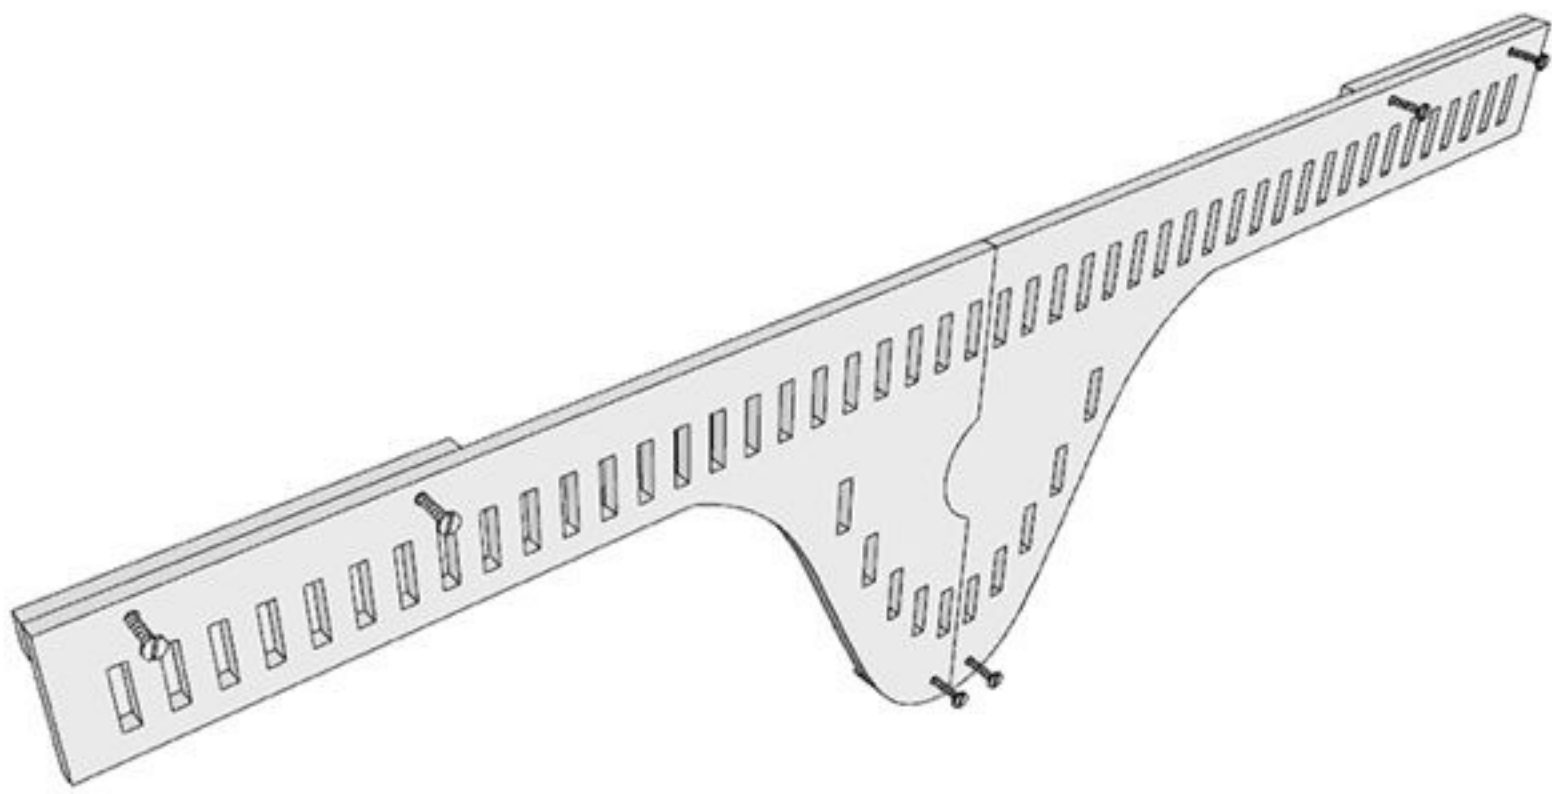

Take reference points from the holes by holding the shelf flat on the wall where you will mount the shelf. Place the dowel by drilling the reference points you have taken on the wall. The shelf base should be positioned upwards

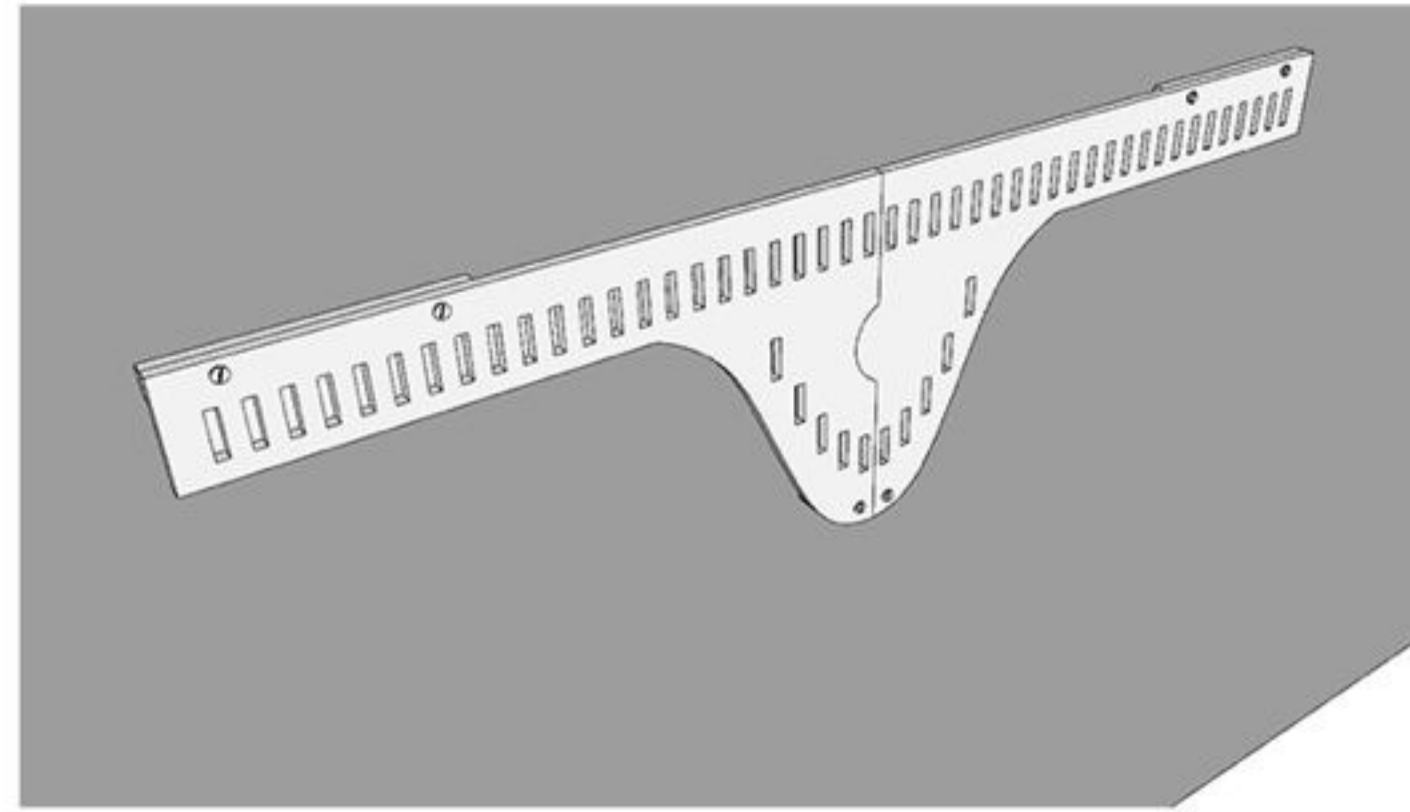

The reference holes

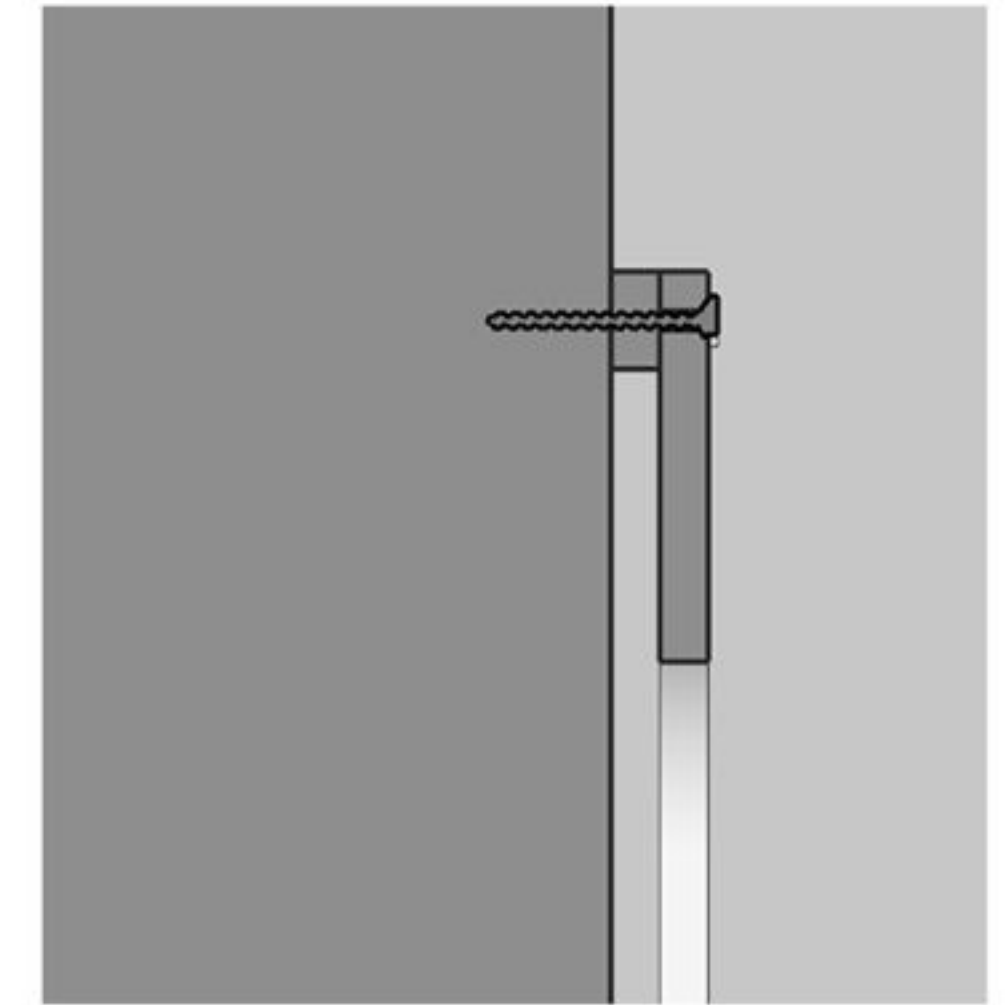

Then, mount the parts that will provide space between the base and the wall with the help of screws, as shown in the figure.

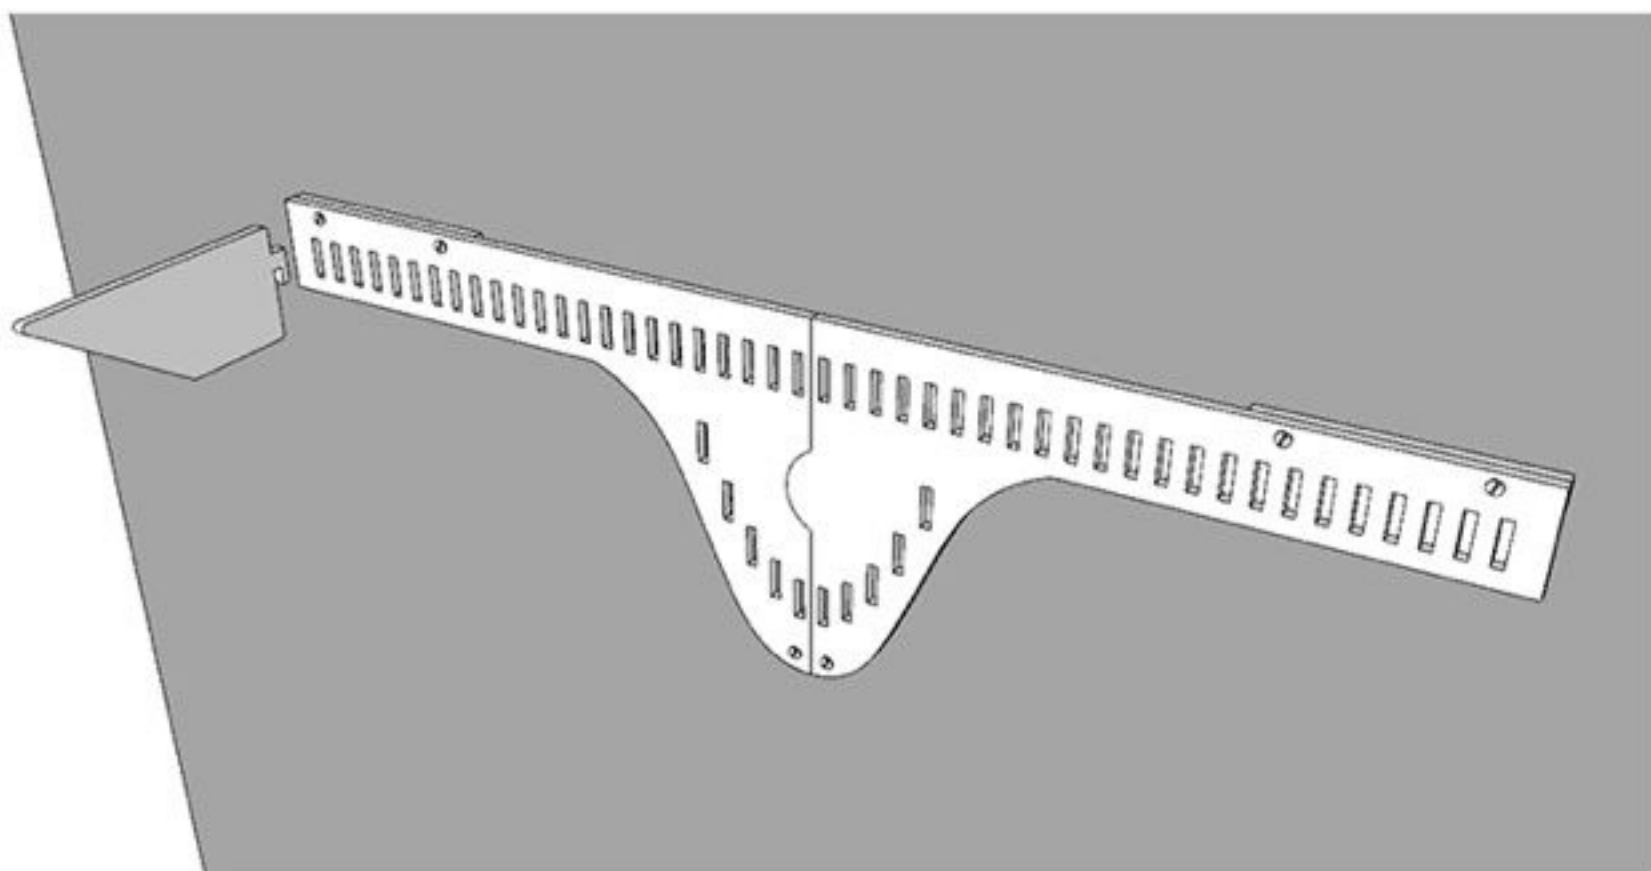

Turn the screws only enough to join the base and the attachments.

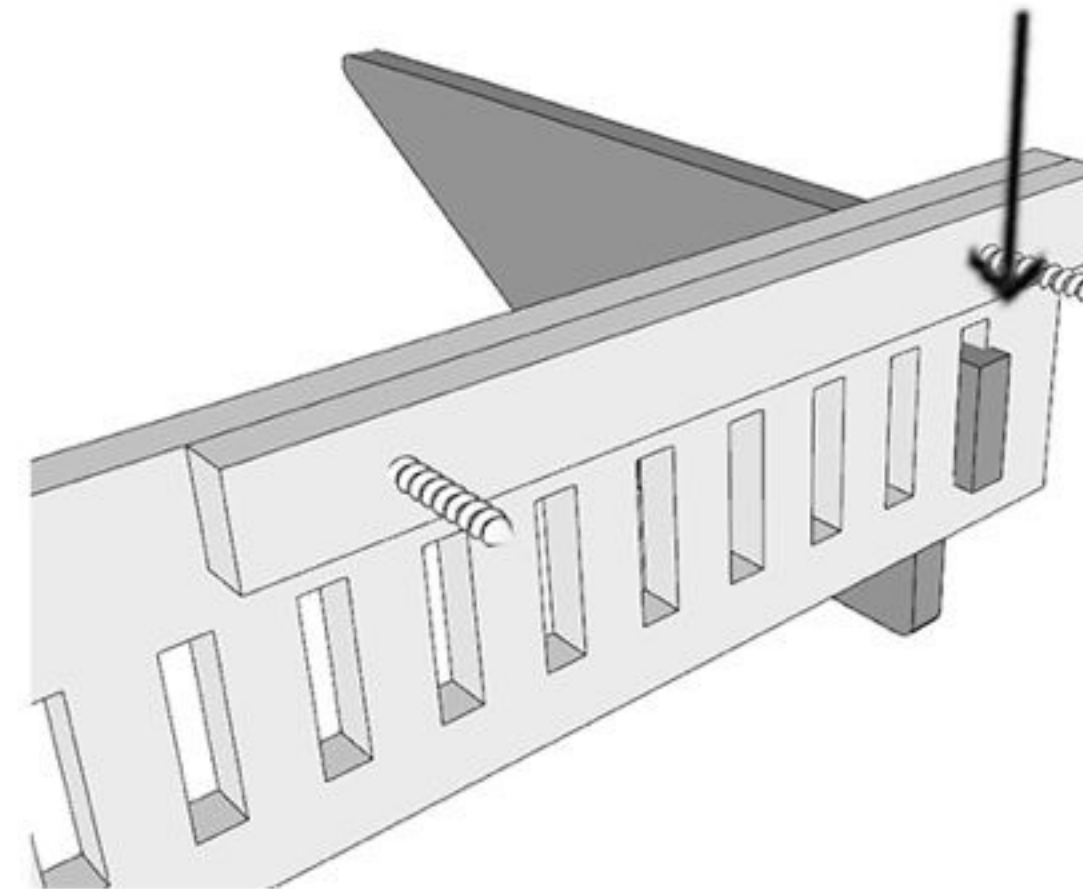

Mount the shelf base to the dowels we previously drilled on the wall.

Wall-mounted section

Then, install the parts, each with a number starting from 0, starting from the left side of the shelf.

The parts are designed to fit like hooks. After placing the parts in the holes, clamp them in a downward motion.

After installing all the parts, your shelf is ready for use. If you have any problems, please contact us first. We would be pleased to see your review with photos of your product. We hope you enjoy it and wish you happy days.
